

## About WYZE

### Who We Are

Wyze Pty Ltd is an Australian owned company that specialises in supplying quality fasteners to the Australian market.

With a depth of experience in the industry, we use our product knowledge to provide a comprehensive range of fasteners which are especially suited and tested for Australian conditions. We back this up with our expert technical support and after sales service.

At Wyze we take pride in providing the best service and best value for money for our customers while valuing the relationships we form with them.

Our mission is to be the best in the fastening industry.

### What Makes WYZE Different

#### Company

##### Australian Owned

We understand the Australian market because we are part of it – so you know who you are dealing with.

##### Australian Applications

Our products are designed specifically for Australian building practices and conditions.

##### Australian Standards

Our products comply with all the requirements of the relevant Australian Standards.

We use corrosion coatings that are AS3566.2-2002 Table 2 compliant, which are specifically designed to deal with Australian conditions.

#### People

##### Relationships

Our focus is on developing long-term relationships with our customers and solutions for their fastening requirements.

##### Experience & Knowledge

We have a depth of experience in the Australian fastening industry, with the management team having over 100 years' combined experience.

##### Passion & Customer Service

We are passionate about the fastening industry and quality service is the cornerstone of the way we operate.

##### Work Ethic

We do whatever it takes to meet our customer's fastening needs in the most cost effective and efficient way.

#### Products

##### Design Innovation

We use our decades of experience to design and produce innovative fastening products for Australian market conditions.

##### Performance

Our products have been designed to provide the best possible performance in every application.

##### Quality

We pay careful attention to the performance of our fasteners and use specialised test equipment to ensure compliance with our stringent specifications.

##### Packaging

Our packaging (both size and type) has been carefully designed to meet what is widely needed and used by the Australian market.

##### Time Saving

Our products are designed to be installed quickly and consistently.
